CURRICULUM OVERVIEW 2025 - 2026

What We Stand For

Newberry Academy is a college preparatory school of academic excellence that values the faith and traditions of the Judeo-Christian experience. The school aims to offer a challenging curriculum that enables qualified students to pursue a lifelong passion for knowledge.

Where We're Going

Newberry Academy aspires to be a beacon of educational excellence, cultivating lifelong learners who are prepared to thrive in an ever-changing world. We envision a community where curiosity is celebrated, diversity is embraced, and every student is empowered to discover their unique gifts. By fostering integrity, leadership, and a spirit of service, Newberry Academy seeks to graduate individuals who will make meaningful contributions both locally and globally.

2K Program

Our 2K program offers a nurturing and engaging introduction to school, designed to support young learners as they grow and explore. Children are introduced to letters, numbers, shapes, colors, and classic nursery rhymes through play-based, hands-on experiences. The program also emphasizes the development of gross motor skills while beginning to build fine motor skills through age-appropriate activities. In a warm and supportive environment, our 2K classroom helps children develop confidence, independence, and a love of learning from the very start.

3K Program

Our 3K program introduces young learners to the building blocks of early education through fun, hands-on activities. With a focus on alphabet, number, shape, and color recognition, children learn through play, exploration, and guided instruction in a nurturing environment that supports social development, curiosity, and a love of learning.

4K Program

Our 4K program provides a joyful, play-based introduction to learning that builds strong early academic and social foundations. Students develop beginning letter sounds, explore numbers, and are introduced to early sight words through engaging, hands-on activities. Learning comes to life as children investigate seasonal science topics, discover their world through social studies, and express creativity through art. With a focus on curiosity, confidence, and a love of learning, our 4K classrooms support each child's growth in a nurturing and developmentally appropriate environment.

Kindergarten

Our Kindergarten program builds a strong foundation for future learning through a phonics-based language curriculum and hands-on math that introduces the essential building blocks for later skills. Students explore simple science concepts and seasonal social studies themes that help them understand the world around them. We also place a strong emphasis on developing fine motor skills through purposeful, engaging activities. Together, these experiences foster curiosity, confidence, and a love of learning in every child.

Enrichment Areas

At Newberry Academy, learning goes far beyond the core subjects. Each week, students enjoy enrichment classes such as Music, Art, Spanish, and Physical Education. These sessions are led by talented teachers who love what they do and make each class engaging and fun.

Kindergarten Extra Curriculars

PE

In physical education, through structured play, movement, and age-appropriate activities, students strengthen coordination, balance, and motor skills while learning cooperation, self-control, and respect for others. In a positive and encouraging environment, children build confidence, healthy habits, and a joyful foundation for lifelong physical activity.

Music

Our Kindergarten music program introduces young students to the joy of music through singing, movement, and rhythm. Children develop listening skills and musical awareness while learning foundational concepts such as beat, tempo, and melody. In a nurturing and engaging environment, students build self-expression and an early appreciation of music as a part of a well-rounded education.

5K Spanish

Our 5K students are gently introduced to a new language through songs, games, stories, and every day vocabulary. Children build listening and speaking skills while developing cultural awareness and confidence in a fun, supportive environment. Early exposure to Spanish encourages curiosity, strengthens communication skills, and lays a foundation for future language learning.

Newberry Academy 2k - 5k School

The 2K–5K program provides a safe, nurturing environment where young learners begin to explore the joy of school. Through play, creativity, and age-appropriate instruction, students develop social skills, confidence, and early learning habits. Each day supports growth, curiosity, and a positive start to a lifelong love of learning.
